Year 2

Autumn 2

Homework Challenge Card

How it works

Over this half term children need to choose a minimum of 3 homework challenge tasks to complete and hand into school on **Monday 14th December**.

If children want to complete more than this, then they are very welcome to do so.

We would encourage children to pick at least one task from each subject area but the choice is down to the individual child.

The homework challenge tasks have been designed to be practical and creative but please continue to use the red homework books to record what children have completed during the half term. This might be by writing about it, using ICT, sticking in drawings or even photos. It would be really helpful if children could date their work.

Adults supporting homework challenge tasks are also free to write in homework books to confirm children have completed particular tasks if necessary.

If you have any questions or help please speak to your child's teacher who will be happy to help.

All challenge card homework for this half term need to be back in school on **Monday 14th December**.

Your choices for this half term

English

*Write a letter to the Prime Minister, explaining what recycling is and give him lots of different facts about recycling. How can you try and persuade him to look after our environment more?

*Exploring books at home or online, list all the different words you find with these sounds in them.

(ee, ea, igh, i-e, ow, o-e)

Can you put them into a sentence?

* When you read your home reader books, start making a list of all the **verbs** and **adjectives** you read. Can you improve on any of the adjectives?

*Get editing! Get an adult to write a sentence in your book with missing capital letters, full stops and some spellings incorrect. Your job is to edit it and write it out correctly.

*Create a recycling poster encouraging children and adults to recycle.

Maths

*Set up your own little shop at home. Get different items and label them different amount (no more than 2 pounds). Practice finding different ways to make the different amounts.

E.g 72p, you could use a 50p + 20p + 2p.

*Go on a shape hunt at home. How many triangles, rectangles, squares, pentagons and hexagons can you find?

*Make a clock and practice telling the time to the hour.

*Practice counting in multiples of 2, 5 and 10 at home. Can you carry on counting in multiples from any number.

*Practice adding and subtracting three numbers.

E.g $14 + 4 + 8 =$

$12 - 5 - 3 =$

Music/Computing./PSHE

*Create a map of your bedroom. Make a key to show what everything is.

*Draw and label a picture of what our world would look like if everyone looked after it. What would the parks, beaches and sea be like if we didn't drop litter.

*Do a journey stick on your way to school or your way home. What do you see?

*Using an iPad or a computer, research the country your family are from. What information can you find out? Favourite food, clothes, music, places to visit.

* What's your favourite song or type of music? Tell us all about it and why you like it.
