Class Information for Parents / Carer

Summer 2024

Teacher: Jack

Class: 6J

Well done, you made it!

I wish you a fun, restful and long Easter break! I hope you all come back feeling refreshed. This is the final term of Year 6 already! We have so much to look forward to in the Summer term — the Year 6 production, the residential, the famous SATs breakfast! This letter will give you an idea of what is coming up in the various subjects in our final term. We have some great units ahead including; two science topics, coding, religious education and STEM week. You've done fantastically well this year, Year 6. Now is the final push to get SATs out of the way and enjoy the last term of your primary school journey. Well done!

English

In English, we will start the term with the book '**Street Child**' by Berlie Doherty. The book is set in Victorian London and is based on the true story of Jim Jarvis. Our writing outcomes will include character descriptions, diary writing, playscripts and formal and informal letters. Towards the end of the term, we will be reading the book '**Pig Heart Boy**' by Malorie Blackman. The story is based on a 13 year old boy who needs a heart transplant. His family is approached by a pioneering doctor with a startling proposal. The children will be taking part in debates where they will be expected to justify their views, with a focus on identifying statements of facts and opinions. Our grammar work will include using key vocabulary; using sentence structures appropriate for formal speech and writing in the subjunctive form. We will also be exploring the perfect form of verbs. Semi-colons, colons and dashes will be the punctuation marks used to enhance our writing.

Reading

Children are expected to read at home every night and discuss what they have read with an adult. It is essential that your child fully understands the text they are reading and become familiar with new vocabulary. Reading helps to develop their understanding of different stories, text types and helps to instil a love of reading. A skill that is vital for children to progress across the whole curriculum.

Maths

In Maths we will continue to revise and deepen our understanding of the four operations and general arithmetic such as fractions, decimals and percentages in tandem with our reasoning and problem solving questions. We will build our confidence in tackling more tricky reasoning problems in preparation for our SATS and then afterwards we will tune into our mathematician minds by completing interesting investigations.

You can help your child at home by: Ensuring that they complete their Maths homework, which they will be receiving weekly from their teacher on a Friday. If you wish to complete any additional SATS preparation, this is always helpful.

PE

This half term we will be doing Gymnastics on Tuesday and P.E. on Thursdays. Please remember to equip your child with an appropriate kit:

A white Gayhurst PE t-shirt, Black shorts/tracksuit bottoms/leggings, Plimsolls or trainers.

Foundation Subjects

Our Science topics for this half term will be Living Things and their Habitat followed by Animals Including Humans. In Geography, our focus of study will be the Geography of the UK. In Design and Technology, we will be learning about Electrical Systems. In computing we will build on our knowledge of Coding. We will continue to teach Art, Spanish, Music and PSHCE on a weekly basis.

School starts promptly at 9.00 am and ends at 3.30pm.
